Cookies policy

Cookies
Access to this website may imply the use of cookies. A cookie is a small file containing a string of characters that is sent to your computer when you visit a website. When you visit the website again, the cookie allows that site to recognise your browser. Cookies may store user preferences and other information. You can reset your browser to refuse all cookies or to indicate when a cookie is being sent.

Those users who do not wish to receive cookies, or want to be informed before they are stored on their computer, can set their computers and browsers accordingly. All recent versions of popular browsers give users the following three basic options for control over cookies:
- Rejecting all cookies
- The browser asks users if they want to accept each cookie
- Accepting all the cookies

Cookies used by this website and what are these cookes used for
Google Analytics (third party cookies):
_utma; _utmb; _utmc; _utmz
Intended for: Recover information with users navigation over this site to know the origin of these visits and other similar data for statistical purposes.
How can users manage or opt out of cookies?
Some people find the idea of a website storing information on their device a little intrusive, in particular when the information is stored and used by a third party. If you would prefer to opt out of cookies, it is possible to control cookies by following the steps below, however you should be aware that you might lose some features and functionality of the website if you do so. Cookies, including those which have already been set, can be deleted from your hard drive. You can also change the preferences/settings in your web browser to control cookies. Some internet browsers have a 'Do Not Track or 'DNT' setting; this sends a signal to websites asking them not to track your browsing.
